Summary

Motivated Electronics and Communication Engineering graduate with strong knowledge of Core Java, SQL, and Web Technologies. Experienced in developing responsive web applications and handling database operations using JDBC and Hibernate. Seeking an entry-level Software Developer role to apply technical and problem-solving skills in real-world projects.

Education

B.Tech Electronics and Communication Engineering	2025
<i>Sri Sai Institute of Technology and Science, Rayachoty</i>	<i>81.72 %</i>

Intermediate Education	2021
<i>R R G R Junior College, Galiveedu</i>	<i>85.1 %</i>

Secondary School Education	2019
<i>Z P High School Boys, Galiveedu</i>	<i>95 %</i>

Technical Skills

Core Java:

- Strong understanding of Object-Oriented Programming (OOPs) concepts
- Knowledge of Static and Non-Static blocks
- Familiar with Java 8 features (Streams, Lambda Expressions)
- Understanding of SOLID principles
- Basics of Exception Handling
- Built simple Java console-based applications for practicing OOP concepts and problem solving.

SQL (Structured Query Language):

- Strong knowledge of Joins and complex queries in RDBMS
- Hands-on experience with DDL, DML, TCL, DCL, and DQL commands

Advanced Java:

- Java Database Connectivity (JDBC)
- Hibernate (ORM Framework)

Web Technologies:

- HTML5, CSS3
- Good understanding of semantic HTML structure
- Experience in building responsive layouts using Flexbox and Grid

Languages: English, Telugu, Hindi, Urdu

Soft Skills: Adaptability, Critical Thinking, Problem Solving, Leadership, Time Management

Experience

Application Developer Web & Mobile

February 2025 – May 2025

Rooman Technologies Pvt Ltd, Bangalore

- Worked with technologies such as HTML, CSS, JavaScript.
- Implemented backend logic and database interactions with MySQL.
- Collaborated with team members to understand application development workflow.
- Familiar with Software Development Life Cycle (SDLC)

Projects

IOT Based Garbage Monitoring System |

January 2025 – April 2025

- Designed and developed a smart waste management system improving real-time monitoring of garbage levels.
- Integrated ultrasonic sensors with a microcontroller (Arduino/Node MCU) to detect waste levels.
- Designed a system that sends alerts when the dustbin reaches maximum capacity.

Interactive Web Development Showcase | *Frontend*

August 2024 – September 2024

- Developed a responsive portfolio website to showcase multiple beginner-level web projects using HTML and CSS.
- Implemented semantic HTML and structured CSS styling to enhance accessibility, layout consistency, and user experience.
- Deployed the project on Github, gaining hands-on experience in live hosting and professional project presentation.
